TITLE : TABLE WITH AIR CLEANER

ABSTRACT : PROBLEM TO BE SOLVED: To enhance the function of cleaning air while preventing cleaned air from directly blowing against table users and blowing up floor dust.

SOLUTION: An exhaust port 35 which opens outwards along the diagonal direction of a top board 2 is provided in the lower part of an air cleaner 4. Since the exhaust port 35 opens toward a corner of a table 1, cleaned air can be prevented from directly blowing against humans. Also, since the exhaust port 35 opens sideways, floor dust is not blown up. Further, since the exhaust port 35 is located in the lower part, cigarette smoke is not diffused even if users of the table 1 position cigarettes outside the top board 2.
